Living List of References of Men of Color

Updated by Daniel King on 1/17/2013
Updated by Joel Wong on 5/6/2013

The list of references below is intended to provide one source of articles on African American, Latino American, Asian American, and Native American men. The idea for this list emerged from a meeting, hosted by Division 51, the Society of the Psychological Study of Men and Masculinity, during the annual convention of the American Psychological Association in San Diego, CA in 2010. The list, proposed by the attending scholars, clinicians, and students, is intended to be a "living list." That is, it should be understood that this is not and never will be a complete list of all scholarship on ethnic minority men. We expect/hope that others will add older and newer references to this list.
